Web Technologies I

Practical class: CSS

Find the slides @ E-studijas (CSS: Basics section)

Darja Solodovņikova – darja.solodovnikova@lu.lv
Maksims Ivanovs – m.ivanovs@lu.lv
Uldis Bojārs – uldis.bojars@lu.lv

Resources

- Slides (e-studijas): CSS basics

- W3Schools - CSS Tutorial
  - Basics (float, position, drop-downs, ...)
  - Advanced (web fonts, rounded images, ...)
  - RWD (responsive web design)

- Code examples
  - links in lecture slides
  - "Code Example" in e-studijas

Tools

- Text / HTML editor / NetBeans
- Browser (Chrome, Firefox, ...)

- **CSS validator** (W3C)
  - http://jigsaw.w3.org/css-validator/

- Developer tools
  - Chrome: Ctrl+Shift+I
  - Firefox: F12

Task

- Download & unzip exercise file (e-studijas)

- Create a meaningful (non-trivial) design using CSS
  - edit the **style.css** file only *

* if you need to modify the HTML file, check with the lecturer

Required - CSS properties:

- **Validate your code with CSS validator**
- **Body and Header**:
  - Set a background image for the body. Use `background-repeat` and `background-position`.
  - Set the background color of the header.
  - Apply padding to the header.
- **Text Formatting**:
  - Apply 2 different Google fonts of your choice to the texts used in the document.
  - Adjust the font size and weight for headings.
  - Add text alignment properties (e.g., center, left, right) to headings and paragraphs. Center-align the header and footer text.
- **Navigation**:
  - Use `text-transform` to uppercase navigation links.
  - Add width, height, padding and margin to space out the links. Change `display: inline-block` property for that. Remove text underlining.
- **Attractions and Images**
  - Display attraction sections as visually separated content blocks.
  - Add borders, padding, margins, and background colors to these blocks.
  - Use border-radius for rounded corners.
  - Set appropriate widths for images while preserving their proportions.
- **Box Model Properties**:
  - Add padding and margin to elements (e.g., headings, paragraphs, and sections).
  - Apply different border styles to at least two elements.
- **Lists and Tables:**
  - Style the ul lists with custom bullets or remove them.
  - Style the table with border (add `border-collapse` property), use different text or background colors for rows and table header.

CSS selectors

- by element type
  H1
  P
  …
- by ID
  #page
  #welcome
  …
- by class
  .main-nav
  .intro
